

ARUBA INSTANT ON 1430 SWITCH SERIES

Fixed Port Web Managed Ethernet Switches

WHAT'S NEW

- Unmanaged Layer 2 Gigabit Ethernet switch series ready to deploy in 5-, 8-, 16-, 24- and 26-port non-PoE and PoE models.
- No configuration or management needed.
- Plug-and-play with fully automated functions and zero ongoing maintenance.
- Up to 124W of PoE to power APs, IP Phones, and other IoT devices.
- Fan-less design for silent deployment

OVERVIEW

The Aruba Instant On 1430 Switch Series is a plug-and-play unmanaged switch series for small businesses looking for simple, reliable, and low-cost network connectivity. These easy-to-use switches deliver Layer 2 Gigabit Ethernet switching capabilities—at an affordable price point—to help connect and share common resources like printers and access points, without any complicated network configuration. With plug-and-play operation, fully automated functions, zero ongoing maintenance, and Power over Ethernet (PoE) models, these switches deliver simple, reliable

in office spaces.

connectivity for the smallest SMBs and home offices.

FEATURES

Unmanaged Ethernet Connectivity for Small Businesses

The Aruba Instant On 1430 Switch Series is an unmanaged Layer 2 Gigabit Ethernet switch series ready to deploy in seven models in PoE and non-PoE configurations: one (1) 5-port, two (2) 8-port, two (2) 16-port, one (1) 24-port, and one (1) 26-port model with 2 SFP uplinks models.

With PoE models, you get up to 30W PoE per port power delivery for Class 4 PoE devices like access points, surveillance cameras and VoIP phones. The 8-port and 16-port PoE models come with the power budget of 64W and 124W respectively to support the latest IoT devices.

Two dedicated 1G SFP fiber ports on the 26-port model can be used for uplinks and to support long distance connectivity using fiber transceivers, for a total of 28 Ethernet ports.

Aruba Instant On Limited Lifetime support provides 24x7 phone support for the first 90 days and chat support for the entire warranty period. Community support is included for the life of the product.

Plug-and-Play Operation

The Aruba Instant On 1430 Switch Series models are easy to use with zero configuration and no required ongoing administration.

The unmanaged PoE models delivers fully automated support for powering compatible IP phones, video surveillance cameras, or wireless access points.

No configuration beyond installation of optional 1GbE SFP transceivers on 26-port model to extend connectivity with gigabit fiber.

Install flexibility with support for table-top, under-table, wall-mount, and rack-mount options (varies per model).

Simplified cabling automatically adjusts for straight-through or crossover cables on all 10/100/1000 ports using Auto MDI/MDI-X.

Energy Efficiency and Traffic Optimization

The Aruba Instant On 1430 Switch Series supports Energy Efficient Ethernet (EEE) and is compliant with 802.3az standard requirements to save energy during periods of low data activity.

All models are fan-less for silent operation in office settings or acoustically sensitive environments and require less power to operate.

Quality of Service provides priority of time-sensitive packets (like VoIP and video) over other traffic based on DSCP or IEEE 802.1p classification.

Jumbo frame support provides up to 9216 bytes frame size to improve the performance of large data transfers.

Flow control provides a flow-throttling mechanism propagated through the network to prevent packet loss at a congested node.

Technical specifications

Aruba Instant On 1430 Switch Series

Ports	26 10/100/1000 RJ-45 ports, 2 SFP 1GbE ports, maximum, depending on model. PoE/PoE+ available on select models.
Memory and processor	32Mb Flash Packet buffer size: 12.0 Mb, maximum, depending on model
Throughput	38.69 Mpps, maximum, depending on model
Switching capacity	56 Gbps, maximum, depending on model
PoE capability	124W maximum, depending on model
Management features	Unmanaged
Input voltage	100-127VAC / 200-240VAC, depending on model
Power Consumption	147W, maximum, depending on model
Product Dimensions (metric)	22.5 x 38.8 x 4.40 cm
Weight	2.3 kg, maximum, depending on model

ARUBA GLOBAL SERVICES

Aruba Global Services simplifies and accelerates the network technology lifecycle, enabling your network to scale with better predictability and cost-effectiveness. Whether you operate your own network and need to improve your IT efficiencies or you want to offload some of the burden, we have the services you need to reach your goals.

Learn more about what Aruba Global Services has to offer at: arubanetworks.com/services/

Support Services from Aruba

Support services reduce complexity and increase your team's productivity, ensuring you keep pace with technology advances and software releases, and obtain break-fix support required to keep your network running. Access to premium services means you have the right help at the right time.

Professional Services from Aruba

With deep intellectual capital and purpose-built tools, our team delivers a range of standard and custom professional services designed to accelerate your value from Aruba technology.

QuickStart Services include:

- Planning, audit and assessment
- Architecture review and design
- Deployment, migration, and knowledge transfer

Proactive Engineering Services include:

- Intelligent Operations
- Customer Experience Management
- Network optimization

Our **Education Services** allow your team to come up to speed quickly.

Aruba Network as-a-Service (NaaS)

Our NaaS solution, Aruba Managed Connectivity Services, part of the HPE GreenLake services family, simplifies network operations, accelerates equipment handling, and increases the value of your Aruba network. If you need expert guidance and automation-based operations for your team, please explore the NaaS approach from Aruba [here](#).
